

**IMPACT ON YOUR BUSINESS: EV-N-SPRED technology saves time and money by delivering the most efficient and cost effective distribution of granular materials for each job via the most accurate and dependable spreader in the industry!**

***EarthWay®***  
**EV-N-SPRED®**

Built for a lifetime of work, the EarthWay® EV-N-SPRED® line of professional broadcast spreaders include the EV-N-SPRED® PRO Dual Port Adjustable Shut-Off System with variable throwing port settings which operate independently from each other for balancing the spread pattern. With a Heavy-Duty Twin-tube chassis with 250# load bearing capacity and 3-position height adjustable handle that allows for comfortable use by all sizes of users. Also equipped with high capacity Rust-Proof Poly Hoppers with debris screens for clog-free operation and with optional heavy-duty rain covers for use in inclement weather. The 13" Turf Type pneumatic tires on rust-proof poly rims roll easily over even the roughest yards and the EV-N-SPRED® "T-Speed Handle" Rate Control and Gauge with Stainless Steel solid linkage for smooth positive operation, and the EV-N-SPRED® High-Speed Gearbox gives your EV-N-SPRED® the largest most accurate spread width in the industry, and with a 5-year Professional Warranty. EarthWay® EV-N-SPRED® the performance you expect.
